

1. Introduction

HireIQ is pleased to announce a new feature to its innovative virtual interviewing solution, InterviewIQ. This document is to provide information and overview on the most significant new enhancements and features. This new feature will be available for all customers effective Tuesday, January 30th, 2018.

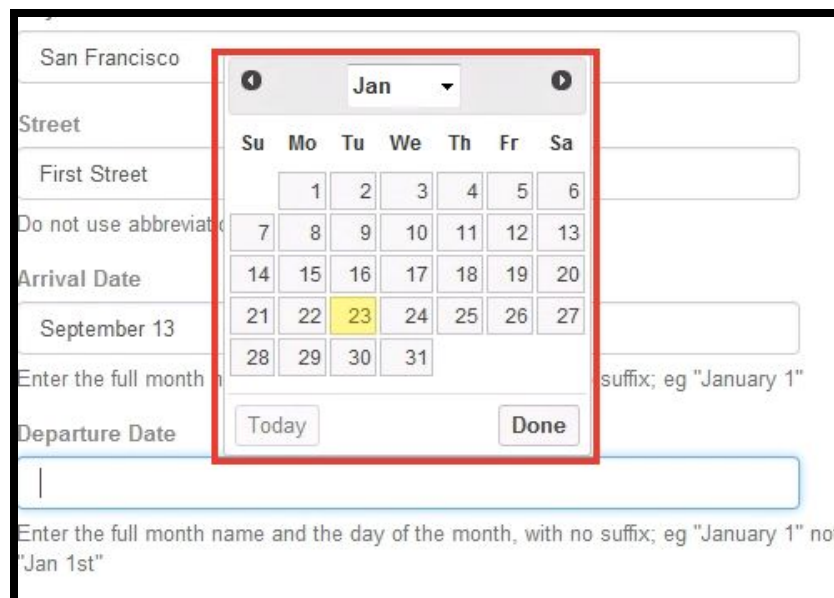

Should you have any questions about InterviewIQ, please open a support ticket by clicking on the “Help” link from within the InterviewIQ application or by e-mailing Support at support@hireiqinc.com

2. New Features

A. Data Entry Assessment: Added Calendar

In effort to test candidates with tools and systems similar to those used on the job, a calendar widget has been added to our Data Entry Assessment. Previously, candidates were asked to enter in the full month and date. They now have the ability to select a date from a calendar widget when required.

We strive to set all candidates up for success, just like our customers! This improvement will allow for further real life job previews, efficiency and even more opportunity for accuracy for candidates.

The screenshot shows a data entry form with several input fields. A calendar widget is overlaid on the form, displaying the month of January. The calendar is a grid with days of the week (Su, Mo, Tu, We, Th, Fr, Sa) as columns and dates (1-31) as rows. The date 23 is highlighted in yellow. Below the calendar grid are two buttons: "Today" and "Done". The form fields visible include "San Francisco", "Street", "First Street", "Do not use abbreviat...", "Arrival Date" (with "September 13" entered), "Enter the full month...", "Departure Date", and "suffix; eg 'January 1'".
